§5–612.

The Plan shall contain recommendations for the most desirable general pattern of land use in the State. The recommendations shall be based on the best available information concerning:

- (1) environmental and natural factors, including climate, soil and underground conditions, topography, and water sources and bodies of water;
- (2) present and prospective economic bases of the State;
- (3) water and sewerage facilities;
- (4) trends of industrial, population, or other developments;
- (5) habits and standards of life of the people of the State; and
- (6) the relation of land use in the State to land use in adjoining areas.
